भतीवय

मैश नाम श्वेता है, मैश बच्चा 22 दिन का है जब से
जन्मा है तब से इसका फेफड़े में दिक्कत है और इसके
सांस लेने में बहुत तकलीफ होती है। डॉक्टर ने बताया
है कि इसके फेफड़े में सूजन भी आ गई है जिससे बच्चे को
फिड कराने और सांस लेने में दिक्कत हो रही है अगर सही समय
पर इसका इलाज नहीं हो पाया तो इसकी श्वासे और स्वराष
हो सकती है। हम चाहते हैं कि संस्था हमारी भवत करे ताकि
हम अपने बच्चे का इलाज सही से करवा सके।
